QUICK-STEP IMPRESSIVE LAMINATE FLOORING

Quick-Step® Impressive is a collection of laminate floors that look and feel exceptionally natural. The planks' authentic wood grains are perfectly reflected in the floor's joints and bevels. Due to the addition of the Hydro-seal to all the joints, this is the most waterproof laminated floor ever manufactured.

HYDRO-SEAL WATERPROOF SURFACE • 10 YEAR WET-AREA WARRANTY • UNICLIC® MULTIFIT SYSTEM
10X MORE SCRATCH RESISTANT • 100% MATCHING ACCESSORIES • UV AND HEAT RESISTANT • SUITABLE FOR UNDERFLOOR HEATING
CAN BE INSTALLED OVER LONGER AND WIDER AREAS WITHOUT AN EXPANSION PROFILE • AC4/CLASS 32

QUICK-STEP IMPRESSIVE MATCHING ACCESSORIES

Quick-Step Incizo® Profile

The profile with Incizo® technology provides a simple solution for a perfect finish to your Quick-Step® floor. You can create any profile imaginable with the knife supplied: expansion profile, adapter profile, transition profile and also an edge profile. Furthermore the Incizo® profile can also be used to finish your stairs. The Incizo® profile provides a handy and economic solution.

Expansion Profile

The Quick-Step® expansion profile is used to join two floors in: doorways, door openings, L-shaped rooms or rooms where the floor is greater in distance than 12m in length or width.

Adapter Profile

The Quick-Step® adapter profile ensures a smooth transition from a Quick-Step® floor and an alternative floor covering at a lower height, like tiles, vinyl or parquet.

Edge Profile

The Quick-Step® edge profile is used to finish the edge of a floor against a vertical surface such as sliding doors, low open windows, a slightly higher doorstep or tiled floor.

Transition Profile

The Quick-Step® transition profile can be used to cover the transition to a fixed carpet, for example.

Stair Profile

You can also cover your stairs or steps with Quick-Step® planks, in combination with the Incizo® profile as a stair nose. In this case, an aluminium sub-profile for application on stairs is needed, to be ordered separately.

Specifications

- Excellent wear and scratch-resistant laminate surface
- No inconvenient seams compared to other multi-functional profiles
- Watertight glued HDF base
- Multi-functional rail supplied can be used in installations with considerable height differences, by bending the lip
- Matching accessories, the Quick-Step® Incizo® profile is available in a design and surface structure that matches your floor perfectly
- Economical, so there is less waste
- Easy, therefore another added benefit of this multi-functional profile is that you always have the right solution on hand
- Complete package, the rail and the knife are supplied together with the multi-functional profile
