

 **AREAS OF USE**

RESIDENTIAL

SUGGESTED SPECIFICATION

Supply and fix 2.60mm thick x 2.0m wide Novilon Iconik 260D & 260T sheeting, manufactured in accordance with EN 653 and laid in FloorworX No. 62 acrylic adhesive which has been spread using a trowel fitted with an A2 notched blade at a rate of between 5.5m² and 6.5m² per litre on a previously prepared Class 1 sub-floor in accordance with SANS 10070, using a reliable Self Leveller when required, including all cutting and waste. The sheeting must be rolled in both directions with an articulated 68kg three-sectional roller immediately after it has been laid into the adhesive. Joins must be welded with Noviweld solvent weld, especially around water points such as baths, basins, toilets and laundries.

 **PLEASE NOTE:** Do not overlay Novilon Iconik 260D & 260T sheeting over old cushion vinyl. If Novilon Iconik 260D & 260T sheeting is laid over old, embossed cushion vinyl the sheeting may indent and the old pattern will start to show through eventually. This will detract from the appearance of the newly laid floors and will result in premature deterioration of the floor surface.
