SUGGESTED SPECIFICATION

Supply and fix 1.90mm thick x 2.0m wide FloorworX Transport sheeting, adhered with FloorworX No. 71 contact adhesive applied to both the sheeting and the previously prepared sub-floor using a brush or paint roller at a rate of approximately 3.5m² per litre per single application, including all cutting and waste. Joins to be butted, grooved and heat welded ensuring that the FloorworX welding rod bonds to more than 70% of the sheet thickness. The sheeting must be rolled in both directions with an articulated three-sectional metal floor roller immediately after it has been laid into the adhesive.

For more information please contact the **FloorworX TECHNICAL DEPARTMENT** by sending your query to technical@floorworx.co.za
